Summary

Hi! My name is Yaroslav. I'm 22 years old. Currently living in Ukraine. I would like to apply as a junior magento backend developer. I used to develop, install and configure various magento extensions, work with Api, databases, do some customization, find bugs and fix them. Sometimes I communicate with the clients to find out their demands to get things done and achieve practical results. Also I'm improving myself in the magento and eCommerce area to become a certified magento developer.

Professional Skills

PHP	MySql	XML
GIT	jQuery	Docker
Linux	LEMP	Magento 2
